```java
import java.util.*;
public class binary
{
public static void main(String args[])
{
     Scanner ps=new Scanner(System.in);
     System.out.print("Enter the first Binary Number");
     String x=ps.nextLine();
     System.out.print("Enter the second nnumber");
     String y=ps.nextLine();

     int n1=Integer.parseInt(x,2);
     int n2=Integer.parseInt(y,2);
     int n3=n1+n2;

      System.out.println("n1 : "+Integer.toBinaryString(n1));
      System.out.println("n2 : "+Integer.toBinaryString(n2));
      System.out.println("n3=n1+n2 : "+Integer.toBinaryString(n3));
     }

}
```
